PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience building web applications and full-stack projects. Interested in developing practical software solutions using Python, FastAPI, JavaScript, and SQL. Experienced in APIs, databases, recommendation logic, and frontend development through academic and personal projects. Strong interest in full-stack development, problem solving, and continuous technical learning.

EDUCATION

Cooch Behar Government Engineering College — B.Tech in Computer Science & Engineering

2nd Year | 3rd Semester | CGPA: 7.97/10 | Expected Graduation: 2029

Tehatta High School — Higher Secondary Education, WBHSE

2024 | 84%

TECHNICAL SKILLS

Programming: Python, C, JavaScript

Web Development: HTML, CSS, FastAPI, Flask, Bootstrap

Database: MySQL, PostgreSQL, SQL

Developer Tools: GitHub, VS Code, Postman

Other: REST APIs, API Integration, Canva

Currently Learning: Data Structures & Algorithms, Python, FastAPI, SQL

PROJECTS

BengalTrail — AI-Powered Tourism Recommendation & Trip Planning Platform | *Team Project* | *Full-Stack Development*

- Developed frontend interfaces for an AI-powered tourism platform focused on recommending lesser-known travel destinations.
- Worked with Python and FastAPI to develop backend functionality and connect frontend components with application services.
- Designed and integrated MySQL database functionality for managing trip, hotel, and destination-related data.
- Implemented AI-based trip recommendation logic considering user preferences and travel requirements.
- Developed budget calculation functionality for personalized trip planning.
- Integrated weather and maps-related APIs to enhance travel recommendations and planning.
- Worked with trip and hotel data to support personalized tourism recommendations.

Weather App | *Individual Project*

- Developed a web-based weather application for retrieving and displaying weather information.
- Implemented frontend functionality using web technologies and API integration.
- Designed the application to provide users with location-based weather information.
- Practiced asynchronous JavaScript, API handling, and dynamic webpage updates.

E-Commerce / Stationery Website | *Web Development Project*

- Developed a stationery-focused e-commerce website as a web development project.
- Worked on the website interface and user-facing components.
- Applied HTML, CSS, and JavaScript concepts to create an interactive web experience.

HACKATHONS & ACHIEVEMENTS

- IIITG INIZIO Hackathon — Participant
- CGEC Internal SIH Hackathon — Participant
- Scholarship Recipient

LEADERSHIP & SOFT SKILLS

Team Player • Problem Solver • Creative Thinker • Hardworking • Leadership

DSA & COMPUTER SCIENCE

Data Structures: Arrays, Linked Lists, Stack, Queue, Trees, AVL Trees, Heap

Algorithms: Searching, Sorting

LANGUAGES & INTERESTS

Languages: Bengali, English, Hindi

Interests: Drawing, Building Software Projects, Exploring Web Development Technologies
